

# 40MHz ~ 60MHz DDS FUNCTION GENERATOR

**DFG-2040 & DFG-2060**

**DFG-2040**

**DFG-2060**

*The DFG-2040 & DFG-2060 DDS function generators with high frequency of 40MHz and 60MHz are designed based on Direct Digital Synthesis (DDS) technology providing flexible performance and system features for basic scientific and industrial requirements.*

*The 10 bits resolution, 180MSa/s sampling rate, 16k pts memory length, and 32 built-in waveforms create various waveforms for different needs. PC software for USB and RS-232 interfaces control and 200MHz frequency counter are provided.*

*These models have additional functions of multiple modulations FM, AM, FSK, ASK and PSK, 40 sets memories and multiple protections. Low-cost, multi-functional, high accuracy and low distortion make them an ideal solution for an accurate and affordable signal source for industrial, scientific research and educational applications.*

## Features

- Max. output frequency of 40MHz & 60MHz
- 2 output channels
- Direct Digital Synthesis technology (DDS)
- Min. output amplitude 1mV (50Ω) with good stability
- Sampling rate 180MSa/s, vertical resolution 10 bits, waveform length 16000 points
- 32 built-in waveforms
- 40 sets save & recall for panel settings
- Modulations: FM, AM, FSK, ASK, PSK
- Frequency sweep, amplitude sweep, burst, CHA & CHB ADD and TTL output functions
- Over voltage, over current, short circuit and reverse voltage protections
- High speed rotary dial and keypad input
- 200MHz external frequency counter
- USB & RS-232 interface for PC remote control
- USB cable & RS232 cable provided

# Technical Specification

| Model                            | DFG-2040                         |  | DFG-2060    |  |  |
|----------------------------------|----------------------------------|--|-------------|--|--|
| Output frequency                 | 40µHz~40MHz                      |  | 40µHz~60MHz |  |  |
| <b>Waveform</b>                  |                                  |  |             |  |  |
| Output waveform                  | Sine, Square, Pulse, DC          |  |             |  |  |
| Waveform length                  | 4~16000 points                   |  |             |  |  |
| Vertical resolution              | 10 bits                          |  |             |  |  |
| Sampling rate                    | 180MSa/s                         |  |             |  |  |
| Sine                             | Harmonic distortion              | $\geq 50\text{dBc} (<1\text{MHz}); \geq 40\text{dBc} (1\text{~}20\text{MHz}); \geq 30\text{dBc} (>20\text{MHz})$ |             |  |  |
|                                  | Total distortion                 | $\leq 0.5\% (20\text{Hz}\text{~}200\text{kHz})$  |             |  |  |
| Square                           | Rise/fall time                   | $\leq 20\text{ns}$   |             |  |  |
|                                  | Overshoot                        | $\leq 5\%$   |             |  |  |
|                                  | Duty cycle                       | 50.00%   |             |  |  |
| Pulse                            | Rise/fall time                   | $\leq 20\text{ns}$   |             |  |  |
|                                  | Overshoot                        | $\leq 5\%$   |             |  |  |
|                                  | Duty cycle                       | 0.1%~99.9%   |             |  |  |
| <b>Frequency</b>                 |                                  |  |             |  |  |
| Range                            | Sine                             | 40µHz~40MHz  | 40µHz~60MHz |  |  |
|                                  | Square                           | 40µHz~20MHz  |             |  |  |
|                                  | Other                            | 40µHz~10MHz  |             |  |  |
| Resolution                       |                                  | 40µHz (40µHz~2kHz); 40mHz (>2kHz)  |             |  |  |
| Accuracy                         |                                  | $\pm(5\times 10^{-5}+40\text{mHz})$  |             |  |  |
| Stability                        |                                  | $\pm 5\times 10^{-6}/3\text{hours}$  |             |  |  |
| <b>Output characteristics</b>    |                                  |  |             |  |  |
| Amplitude                        | Range                            | 1mVpp~10Vpp (into 50Ω, $\leq 10\text{MHz}$ )   |             |  |  |
|                                  |                                  | 1mVpp~5Vpp (into 50Ω, 10MHz~40MHz)   |             |  |  |
|                                  |                                  | 1mVpp~2Vpp (into 50Ω, $\geq 40\text{MHz}$ )  |             |  |  |
|                                  |                                  | 2mVpp~20Vpp (open circuit, $\leq 10\text{MHz}$ )   |             |  |  |
|                                  |                                  | 2mVpp~10Vpp (open circuit, 10MHz~40MHz)  |             |  |  |
|                                  |                                  | 2mVpp~4Vpp (open circuit, $\geq 40\text{MHz}$ )  |             |  |  |
|                                  | Resolution                       | 20mVpp (amplitude>2V); 2mVpp (amplitude<2V)  |             |  |  |
|                                  | Accuracy                         | $\pm(1\%+2\text{mVrms})$ (open circuit, 1kHz, sine)  |             |  |  |
|                                  | Stability                        | $\pm 0.5\% /3\text{hours}$   |             |  |  |
|                                  | Flatness                         | $\pm 5\% (<1\text{MHz}); \pm 10\% (1\text{~}10\text{MHz}); \pm 20\% (>10\text{MHz})$                             |             |  |  |
| Offset                           | Output impedance                 | 50Ω  |             |  |  |
|                                  | Range                            | $\pm 10\text{V}$ (open circuit, attenuation 0 dB)  |             |  |  |
|                                  | Resolution                       | 20mVdc   |             |  |  |
| Accuracy                         |                                  | $\pm(1\%+20\text{mVdc})$   |             |  |  |
| <b>Sweep</b>                     |                                  |  |             |  |  |
| Parameter                        | Frequency, Amplitude             |  |             |  |  |
| Range                            | Free to set start and stop point |  |             |  |  |
| Time                             | 100ms~600s                       |  |             |  |  |
| Direction                        | Up, Down, Up-Down                |  |             |  |  |
| Mode                             | Linearity, Logarithmic           |  |             |  |  |
| Control                          | Auto sweep or manual sweep       |  |             |  |  |
| <b>Frequency Modulation (FM)</b> |                                  |  |             |  |  |
| Modulating signal                | Internal or external signal      |  |             |  |  |
| Deviation                        | 0%~20%                           |  |             |  |  |

## DFG-2040 & DFG-2060

| Model  | DFG-2040  | DFG-2060 |
|--|---|----------|
| <b>Amplitude Modulation (AM)</b>                 |   |          |
| Modulating signal                                | Internal or external signal   |          |
| Depth  | 0%~120%   |          |
| <b>Shift Keying</b>                              |   |          |
| FSK  | Free to set the hop frequency and the carrier frequency   |          |
| ASK  | Free to set the hop amplitude and the carrier amplitude   |          |
| PSK  | Hop phase: 0~360°, resolution: 11.25°   |          |
| Alternative rate                                 | 10ms~60s  |          |
| <b>CHB output characteristics</b>                |   |          |
| Output waveform                                  | 32 built-in waveforms, including Sine, Square, Triangle, Saw tooth, Ladder, etc.                                  |          |
| Waveform length                                  | 1024 points   |          |
| Vertical resolution                              | 8 bits  |          |
| Sampling rate                                    | 12.5MSa/s   |          |
| Frequency range                                  | Sine: 10mHz~1MHz; Other: 10mHz~100kHz   |          |
| Frequency resolution                             | 10mHz   |          |
| Frequency accuracy                               | ±(1x10 <sup>-5</sup> +10mHz)  |          |
| Amplitude range                                  | 50mVpp~20Vpp (open circuit)   |          |
| Amplitude resolution                             | 2mVpp   |          |
| Output impedance                                 | 50Ω   |          |
| CHB signal is used as the harmonic signal of CHA |   |          |
| Harmonic times                                   | 0.1~250.0 times   |          |
| Harmonic frequency                               | <1MHz   |          |
| Phase adjustment                                 | Coarse: 11.5°/step; Fine: 2°/step   |          |
| CHB signal is used as burst signal               |   |          |
| Frequency of CHB                                 | 40mHz~1MHz  |          |
| Burst frequency                                  | 10mHz~50kHz   |          |
| Burst count                                      | 1~65000 cycles  |          |
| Trigger source                                   | Continuous, Single  |          |
| <b>TTL output</b>                                |   |          |
| Waveform   | Square, rise/fall time ≤20ns  |          |
| Frequency  | Same as CHA signal  |          |
| Amplitude  | TTL, CMOS compatible, low<0.3V, high>4V   |          |
| <b>Frequency counter</b>                         |   |          |
| Frequency range                                  | 1Hz~200MHz  |          |
| Input amplitude                                  | 100mVpp~20Vpp   |          |
| <b>General</b>                                   |   |          |
| Operation characteristics                        | Key operation for all functions, Menu display, Rotary dial adjustment   |          |
| Interface  | USB and RS-232 interface  |          |
| Operating environment                            | 0~40°C, <80%RH  |          |
| Power source                                     | AC110V/220V±10% selectable, 50/60Hz, Max. 45VA  |          |
| Standard accessories                             | Power cord x1, Operation manual x1, BNC-BNC cable x1, Test lead x1, Software CD x1, USB cable x1, RS-232 cable x1 |          |
| Dimension (WxHxD)                                | 260x110x385mm   |          |
| Weight   | 3.5kg   |          |
